Description

The Microspeedy kit is a professional quality, complete flat mop system which enables easier, faster and more effective cleaning, especially in high traffic environments where surfaces need to be cleaned and dried quickly.

It is designed to be used with our highly effective and easily fitted 40cm microfibre flat mop heads, which use the minimum amount of water for fast drying, and do not need chemicals to give excellent cleaning results.

The plastic break-frame ensures easy fitting and removal of mop heads which are flagged with four colours.

The kit comes complete with the 125cm colour coded Hygiene handle and the wheeled 20L Speedy mop bucket, a combination bucket and wringer with a built-in water divider for better hygiene.
