## Description

Perfect for lining bins to help keep dirt and germs from the bin itself, these refuse sacks are a simple but reliable product suitable for a multitude of applications and industries.

They're an easy and sanitary way of dealing with waste, and they also help to minimise odours by reducing the chance of bins becoming contaminated with that waste.

each sack approximate size  $457 \text{mm} \times 724 \text{mm} \times 965 \text{mm}$ 

case of 4 x 50 sacks

- A convenient and sanitary way of dealing with waste
- An effective barrier between waste products and their containers
- Easy to use and secure with minimal contact with waste matter
- Reduce odours and minimise the need for cleaning bin interiors
